About This Content

For decades the Kollossae, a proud people of faith and large stature, have wandered the face of Amalur in pursuit of the destiny that is due to them, but all does not appear right. Upon your expedition to Teeth of Naros, Secandra and her band of Kollossae warriors require your help to solve the riddle of the Titans. A mysterious force beckons the Kollossae toward a destiny they may not entirely want nor are ready to embrace.

Take on a crucible of faith filled with fantastic new enemies and determine if you are fated to be favored by the gods or forsaken by them. In an epic new journey filled with tons of side quests, adventure through a paradise seen by few, and for good reason. Ascend to the floating city above Teeth of Naros and get a glimpse into the future of Amalur.

This game is fun af. It's the perfect time waster and I highly recommend. The best run and gun game there is. Yes it might be a little out dated but it's still a great game to play!. Half an hour in and I can already tell this is quality. The developer has put in an obscene amount of effort (particularly with smaller details), putting it well above CH on that merit alone. Really, just sit down and study CH in detail for a little while; it's got tons of problems in every area, and all the developers can hope for is to just put out a good sequel that wipes the previous slate clean.

So what does a great game like TTI here get? Multiple clowns in the reviews bashing it for insane reasons. I felt it deserved an upvote, so here it is.. I just played this for a few hours. The manner of flight in combination with combat and graphics is just what I was looking for. I look forward to more content in single player and a broader community in multi player. This has enough positive reviews to be "Very Positive" at this point, which would be well deserved.

Dev,

- I would like access to beta.
- Add some fall damage for even more challenge.
- Add an option so that one does not need to push down on touch pad to thrust; less wear & tear.
- When using touch navigation to run around on the ground, allow for sprint or faster movement.
- Add bots for filler coop players so that matches can start immediately and new players can replace bots as they join.

Great game! Loving it!. great movement

- sound always works
- totally not buggy
- you can quit the game from the main menu
- many people play this game
- i like it
- not. Pros:
- Fun little game
- Graphics are nice

Cons:

- Nothing really. One of the best games that i played!
- . nah the game is just ok
- i have barely 1000 hours + before the dlc
- so nah its not big deal :). I just love this game, I just love it, the system is by far better than Civilizations V or VI, better multiplayer, better balance system, better combat... I will always recommend this game but I do hope they fix the AI, it's just annoying every time.

Well done graphics. Lack of strategy, lack of weapon development, lack of gameplay feedback, glitchy sound, one strategy beats the game, etc. And It is very short. Good to spend an hour if you bought it on sale. With good discount. I had 60% off, but wish it was 80%.. decent fun, a lot like Mass Effect, and Warframe. I have no idea where it is. I can see the files on my hard drive but FSX-SE just cannot "see"

those files. I paid the money but

I had to say something in the either...or recommendation. I have no idea if it's a good game

or not. My paid-for FSX-SE just cannot find it.. Lamplight City is just about everything I could want in an adventure game.

Mysteries to solve, choices to make, pitfalls to avoid, and characters written well enough to care about.

Setting wise, it's also a love letter to everything steampunk. If you're a fan of sherlock holmes or thomas edison alike, you'll probably get well invested into the world the game takes place in.

Being an adventure game, you'd want the story to shine front and center, and it for sure does. 5 unique cases, 4 individuals, and the 5th which acts as a tie in of little threads from the previous cases, but primarily is a closer to the question from the prologue the game has been teasing the whole way through. Each case is well thought out, with multiple conclusions you're allowed to draw (both right and wrong) and is rife with puzzles of varying difficulty. This in my opinion is one of the few flaws the game has. While the puzzles are smart, finding the clues you need can sometimes be a bit of a pixel hunt. Usually this comes in the form of not being able to go to a new destination, or discuss a specific topic with someone unless and until the you find the minute detail the game has deemed vital to following the plot thread. It never impedes the gameplay too badly, but do expect to pour over every area with a fine toothed comb to complete a case.

The art direction for the game is beautiful, and harkens back to a 90's era of point and click graphics. Think gabriel knight or monkey island. It's a style that has a timeless appeal to it, and it's done well and backdropped with beautiful cityscapes. Conversations are carried out in a separate black screen, with animated portraits (fully and well voice acted too!) The portraits look great, and show a range of emotions as characters react to conversation topics.

Overall, Lamplight City is an absolute joy of an adventure game. I took my time to enjoy all the little details the world had to offer (and got stumped now and again) and the game ran me about 35 hours. This may vary for you if your goal is to just blitz through the cases, but you'd be doing yourself a disservice if you did. If you allow it to, the world and characters really come alive. And while the game can sometimes be pixel hunty, it by no means detracts from the overall gameplay. A full recommendation.. wish there was a way to quit the program without crashing the desktop. Pretty good music. But the game is boring and long and very easy.. The best VR arcade shooter ever!. very fun and enjoyable farm sim, focusing on adventure and making friends. the game gets better and better with every update!
